

Session Five: Programming Party

After working hard to build their robots, all the students came together to learn how to program their robots to walk in a straight line or follow a curved black line in order to successfully complete their missions at the closing ceremony.

In addition to programming their robots, the students discussed how their individuality and differences can make their teams stronger. The theme of this session's Map It! activity was the following: 3 people who are important to me, 4 people I want to know better, & 5 ways I can improve my relationships.
